# 20/20 MineVision Software

- Exploration
- Mine Design
- Surveying & Orebody Modelling
- Mine Scheduling
- Reconciliation software
- Mine Planning
- Slope Optimization
- Pit Optimization
- Mine Production

Mining, exploration and civil companies worldwide have been using SiamOz Mining Solutions 2020 MineVision software to develop cutting edge solutions for their exploration, mining and civil requirements. 2020 MineVision Mine Planning and Design Software provides:

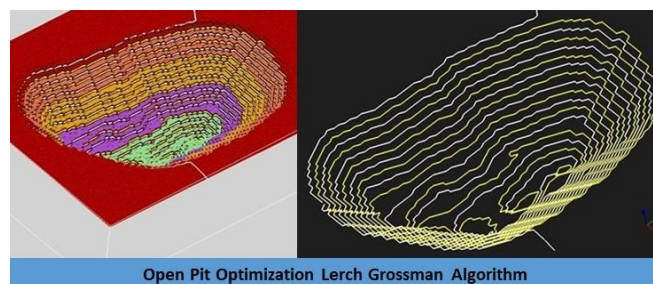

- Easy to Learn and Use and is Fast and Accurate;
- Improved Automate Tasking Capability;
- Improved Data Management for Mining and Exploration;
- Improved Geological Modelling;
- Enhanced Blast Hole and Ring Design, Mine Planning (Open Pit and Underground), Slope Optimization, Surveying and Production Management;

- Increased Productivity through ease of use;
- Improved Powerful 3D Graphic Interface, Live plan/section plotting, Auto file updating;
- Improved Skill Sets;
- Improved Co-ordinate Transformation, (GPS);
- Improved Civil Design Functions;
- Multilingual capability to meet international requirements;
- Improved Environmental Management; and
- Enhanced Systems integration; and Improved Data Security and Auditing capability.

## Advantages of 2020 MineVision Software over other packages include:

- Is Intuitive to use (Uses a very straight forward and logical approach to carry out tasks);
- 2020 MineVision provides user the opportunity use our in built database thus saving them the cost of having a separate database software package;
- Include and external Geological and Environmental database system if requested;
- Can load, view and manipulate more than one drillhole database at one time;
- GIS multiple layering capability;
- 2020 MineVision is the world's leading open pit optimization software;

- Ideal for deposits requiring either Laminar i.e. " Coal" or Block Modelling;
- The Mine Scheduler provides both 2D and 3D graphic data and allows the user to generate scheduled volume/grade reports and 3D solids of scheduled mining blocks;
- 2020 MineVision fully integrates with most mine tracking systems;
- 2020 MineVision fully capable of being used for civil design work;
- Integrates easily with other mining and civil packages; and
- Where possible Software Tailoring, specific to our clients' needs assisting them in reach their corporate goals.

# 20/20 MineVision Software

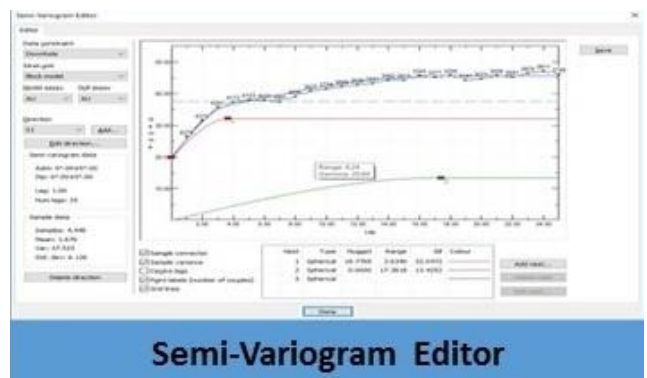

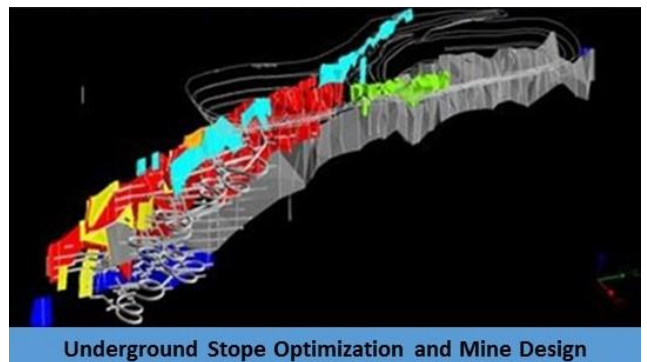

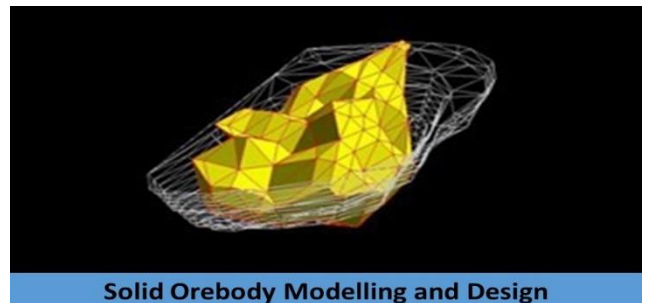

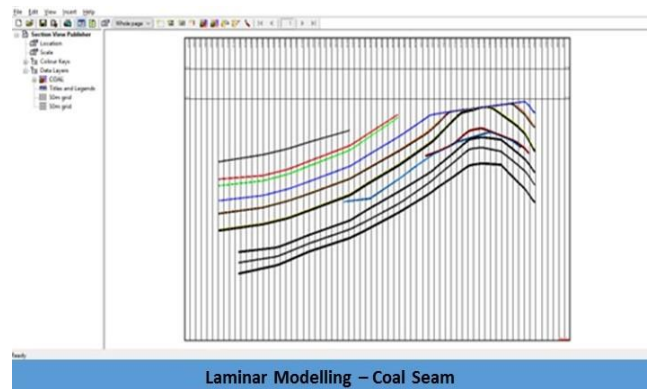

20/20 MineVision has been used as the go-to software for every commodity type and mining method worldwide by:

Mining and Exploration Companies  
Civil Engineering Groups

Resource Consultants;  
Environmental Companies;

Listed below are just a few of the many companies and projects that 2020 MineVision Software has/is involved in:

- ✔ Otter Gold Pty Ltd – Tanami Operation, Northern Territory, Australia, 29 Pits and 1 Underground.
- ✔ Tanami Gold NL – Coyote and Central Tanami Operation, Australia, 32 Pits and 1 Underground.
- ✔ Richmond NL – Gold Mine, Quebec, Canada.
- ✔ Capricorn Coal – Coal Mines/Projects, Australia and USA.
- ✔ Greenland Resources – Gold Mine, Greenland.
- ✔ Eloro Resources Ltd – Gold/Copper Project, Peru.
- ✔ Sherwin Iron – Iron Ore Mine, Northern Territory, Australia.
- ✔ Blackdome Project – Underground and Open Pit, British Columbia, Canada.
- ✔ Rolute Ltd – Gold/Copper Mines and Projects, Australia, Tanzania, Mali and Ghana.
- ✔ Nabalco/Alcan – Gove Bauxite Mine, Australia.
- ✔ Crocodile Gold Ltd – Underground and Open Pit, Northern Territory, Australia.
- ✔ Union Reefs NL – Underground and Open Pit, Australia.
- ✔ Calvista Gold NL – Underground and Open Pit, Columbia South America.
- ✔ Ethan Minerals Ltd – Open Pit Lead Mine, WA, Australia.
- ✔ Mwila Investments and Minerals Zambia Ltd Copper Mine, Open Pit, Zambia.
- ✔ Beattie and Donchester – Gold Project, Underground and Open Pit, British Columbia, Canada.
- ✔ Lion Resources – Gold Project, Zambia.
